

Dam Safety & Dam Removal Options Seminar

Silver Lake Dam, Woodridge, NY. Photo: Daniel Case.

This seminar will contain information of interest to municipal leaders, dam owners, lake association members, residents and business downstream of dams, and community members concerned about waterways in the Hudson Valley. This seminar will include time for participants to express concerns and ask questions about specific issues related to dams, and provides an opportunity for people with issues related to dams to speak with professionals in the field. Dam owners and partners interested in dam removal will hear about available resources.

PRESENTED BY:

Alon Dominitz, Section Chief, Dam Safety, NYS DEC Division of Water

Andrew Meyer, Conservation Specialist, NYS DEC Hudson River Estuary Program

Certificates of attendance for municipal training credit will be provided.
