

Pocantico River: % Samples Achieving EPA Safe Swimming Guideline

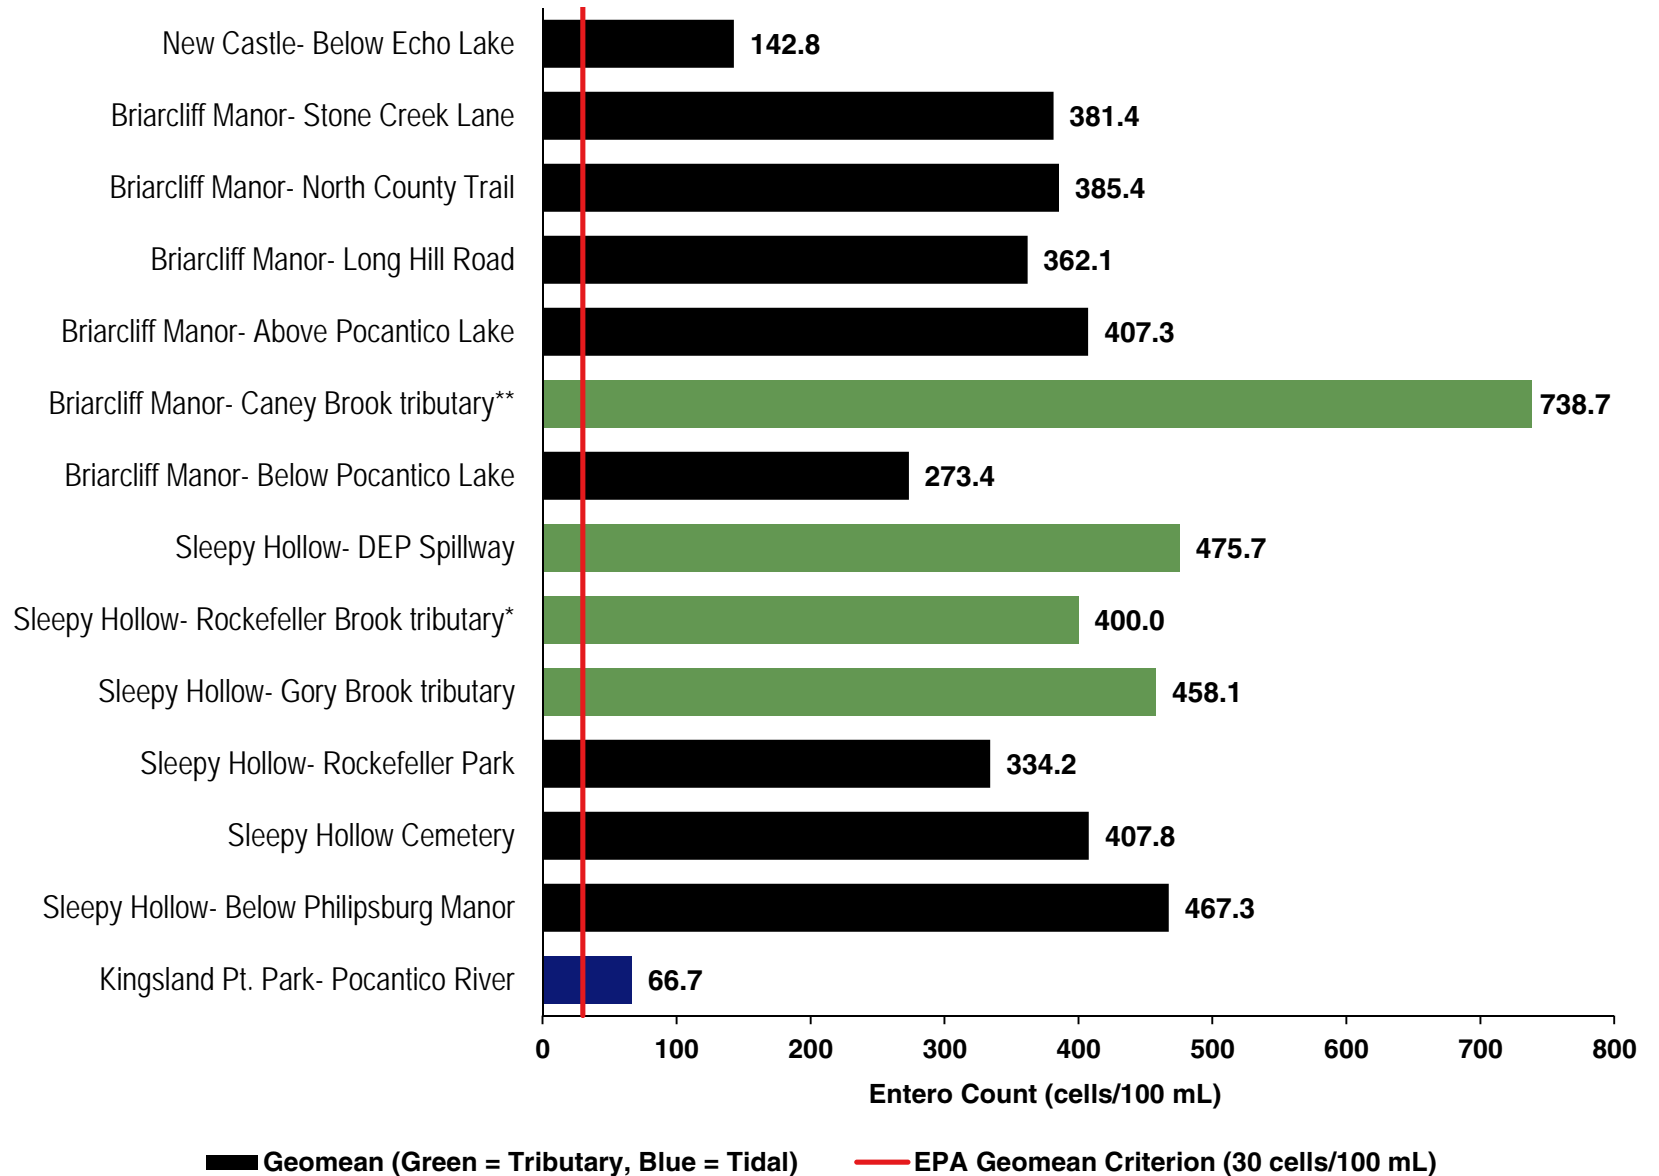

Samples collected by community scientists and processed by The Sarah Lawrence Center for the Urban River at Beczak and Riverkeeper. Results are based on 27-47 samples per site, collected monthly from May-October, 2012-2019. EPA's recommended Beach Action Value (BAV) is a guideline for day-to-day beach management.

Sampling expanded to these sites in *2014 and **2015.

Pocantico River: Geometric Means of *Enterococcus* Counts

Samples collected by community scientists and processed by The Sarah Lawrence College Center for the Urban River at Beczak and Riverkeeper. Results are based on 27-47 samples per site, collected monthly from May-October, 2012-2019. The geometric mean is a weighted average.

Sampling expanded to these sites in *2014 and **2015.

Pocantico River *Enterococcus* Monitoring Results Year-by-Year Comparison, 2012-2019

Samples collected by community scientists and processed by the Sarah Lawrence College Center for the Urban River at Beczak and Riverkeeper. Results are based on 65-78 samples per year collected monthly from May-October. Only samples from non-tidal sites are included in this comparison. The geometric mean is a weighted long-term average. Wet weather is defined as greater than or equal to 0.25" of total rainfall on the day of sampling plus three prior days.
