

## Rondout Creek: % Samples Achieving EPA Safe Swimming Guideline

*Samples collected by Rochester and Wawarsing Environmental Conservation Commissions and community scientists, and processed by Riverkeeper. Results are based on 36-52 samples per site, collected monthly from May-October, 2012-2019. EPA's recommended Beach Action Value (BAV) is a guideline for day-to-day beach management.*

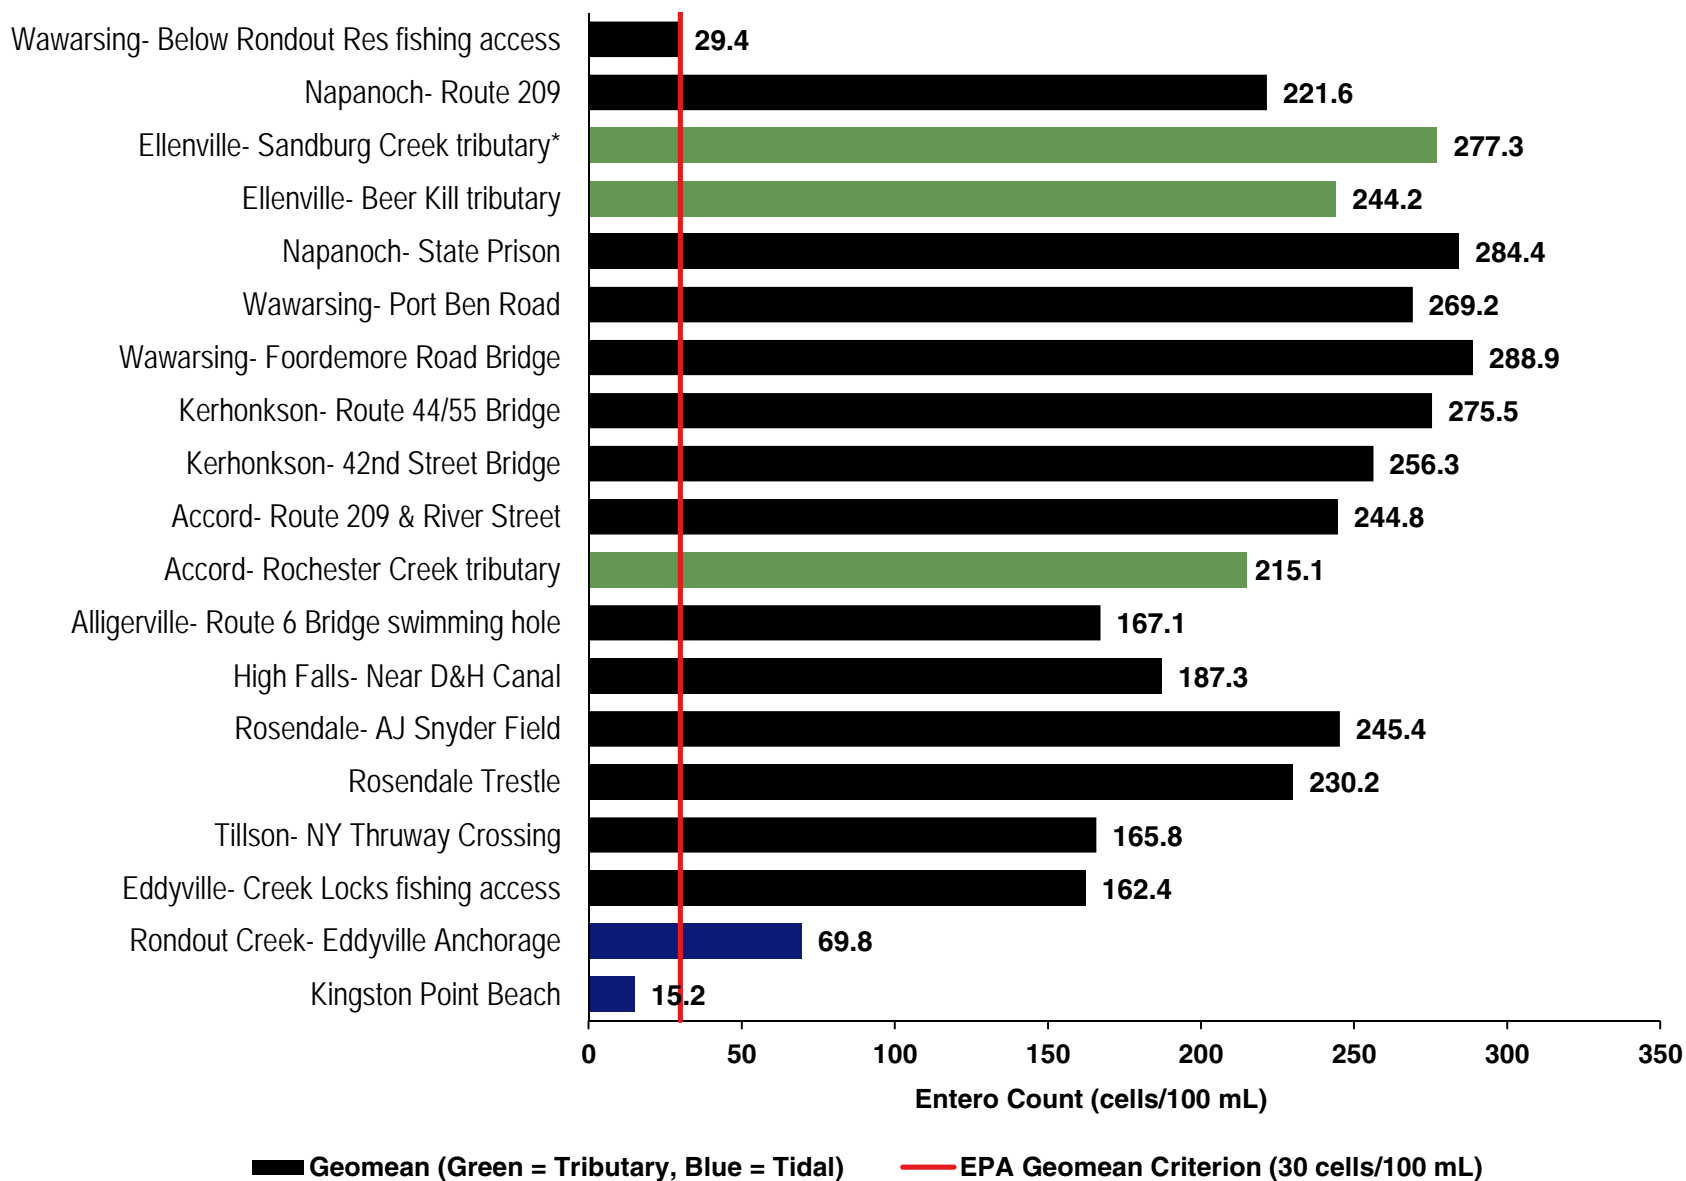

\*Sampling at this site began in 2014.

### Esopus Creek: Geometric Means of *Enterococcus* Counts

*Samples collected by Rochester and Wawarsing Environmental Conservation Commissions and community scientists, and processed by Riverkeeper. Results are based on 36-52 samples per site, collected monthly from May-October, 2012-2019. The geometric mean is a weighted average.*

\*Sampling at this site began in 2014.

## Rondout Creek *Enterococcus* Monitoring Results Year-by-Year Comparison, 2012-2019

Samples collected by community scientists and processed by Riverkeeper. Results are based on 95-103 samples per year collected monthly from May-October (non-tidal sites only). One site was added in 2014. The geometric mean is a weighted long-term average. Wet weather is defined as greater than or equal to 0.25" of total rainfall on the day of sampling plus three prior days.
